

KENECHUKWU NNAKWUE

SENIOR SOFTWARE ENGINEER | BACKEND & FULL-STACK

Lagos, Nigeria | (+234) 813 792 6904 | nnakwuekenny@gmail.com | codehermit.netlify.app | LinkedIn | GitHub

PROFILE

Senior software engineer with 8+ years of experience building web and software products across backend, frontend and infrastructure. Strongest in TypeScript, Node.js and React, with hands-on experience across Python and PHP ecosystems. Experienced in microservices, event-driven architecture, payment and third-party integrations, containerised deployments and CI/CD. I take products from architecture and implementation through launch and production support, while remaining hands-on technically and leading engineering teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, PHP

Backend & frontend: Node.js, Express.js, NestJS, FastAPI, Flask, Django, Laravel, React, Next.js, React Native and Angular

Architecture & data: Microservices, event-driven systems, REST APIs, layered architecture, monorepos, RabbitMQ, Redis, MongoDB, relational databases

Infrastructure & delivery: Docker, GitHub Actions, CI/CD, Linux, cloud deployments, production support

Integrations: Stripe, Paystack, third-party APIs

PROFESSIONAL EXPERIENCE

Head of Engineering · Part-time

Nov 2025 - Present

Techsense Developers | Nigeria

- Own technical direction and architecture across frontend, backend and infrastructure, guiding systems from solution design through production delivery.
- Lead engineering execution and translate product requirements into scalable, maintainable technical solutions.
- Drive architecture and code reviews, helping engineers make sound implementation decisions and maintain engineering quality.
- Establish engineering practices across CI/CD, documentation, release quality, code review and technical debt management, while mentoring engineers and resolving delivery blockers.

Lead Software Engineer · Startup

Jul 2023 - Present

NotJustEvent | Lagos, Nigeria

- Built the company's backend systems from the ground up and helped launch the platform within eight months, sustaining 99.9% uptime and more than 50,000 API requests per day.
- Designed event creation and ticketing microservices with TypeScript, Node.js, MongoDB and RabbitMQ, supporting 2,000+ events and 100,000+ attendees.
- Integrated Stripe and Paystack for secure payment processing, supporting transactions for more than 10,000 active users.
- Built a scalable promotion and discount-code system with Redis, validating more than 20,000 codes for organisers and attendees.
- Lead a team of five engineers, conduct code reviews and drive Agile delivery and CI/CD practices to improve release reliability.

Software Engineering Lead / Software Engineer

Jan 2025 - Jul 2025

Punch Group | Miami, United States

- Led technical execution across cross-functional product initiatives, guiding engineering work from solution design and implementation through delivery.
- Designed and reviewed application architecture and implementations with a focus on maintainability, reliability and alignment with product requirements.
- Developed and improved production product features while conducting code reviews and providing technical guidance to engineers.
- Partnered with product and design to turn requirements into technical solutions and strengthen delivery processes and code quality.

Software Engineering Lead

Jan 2023 - Jan 2025

Yoris Africa | Lagos, Nigeria

- Built and maintained backend APIs with Node.js, Express.js and TypeScript, supporting more than 50,000 daily requests with 99.9% uptime.
- Designed a RabbitMQ-based microservices architecture processing 10,000+ messages daily and enabling resilient asynchronous workflows.
- Revamped the administration dashboard with React and TypeScript, improving page-load performance by 40% while modernising the user experience.
- Containerised and deployed backend services with Docker, reducing deployment time by 60% and improving consistency across development and production.

PROFESSIONAL EXPERIENCE - CONTINUED

Content Advisory Board Member · Advisory Jan 2022 - Present
LogRocket | United States

- Review developer-focused technical content and provide feedback on technical accuracy, relevance and content direction.
- Contribute through periodic advisory reviews and surveys covering developer technologies and industry trends.

Full-stack Web Developer Oct 2021 - Dec 2022
STLEMLab NG | Kano, Nigeria

- Worked directly with clients to translate product requirements into functional, maintainable web applications.
- Led projects from planning through launch using React, Node.js, Express.js, MongoDB, HTML, CSS, Bootstrap and JavaScript.
- Built responsive interfaces, extended existing codebases and implemented new product functionality.
- Mentored junior developers and introduced coding standards, ESLint checks and pull-request review workflows to improve quality and reliability.

Web Developer Jul 2017 - Oct 2021
Freelance | Upwork & Direct Clients

- Built websites and customer-facing web applications for clients using HTML, CSS, Bootstrap and JavaScript.
- Worked directly with clients to understand requirements, implement requested features, make revisions and deliver completed web solutions.
- Managed projects from initial client discussions through development and delivery across Upwork and direct client engagements.

OPEN SOURCE

BriefProbe 2026 - Present
Open-source research project | Python & LLM evaluation

- Built Python research tooling to identify contradictions, missing decisions and already-settled decisions in software briefs, and to check brief claims against existing codebases.
- Designed reproducible evaluations comparing direct prompting with agent-based code search across issue recall, cost and latency, including selective repository search over larger codebases.

Linqsy 2026 - Present
Open-source project | npm

- Built and published a TypeScript-based LAN file-sharing tool that starts from the CLI and lets nearby devices connect through a browser using a QR code or join link.
- Designed the tool around Node.js, Fastify, WebSockets and React, with file and folder transfer flows packaged in a pnpm monorepo.

EDUCATION

Bachelor's Degree, Computer Science 2019
Federal University Otuoke | Nigeria
